

Profile User Conference 5th December, 2011

Intrahealth Canada presents its second Annual User Conference
at the River Rock Conference Center in Richmond, BC

**NO
CHARGE!**

With participation of • AcceEMR • Ice Peak Solutions • Valley Medcom • Gennix

This year's Conference offers six workshops focused on use and optimization of a specific Profile functionality including steps and workflow details.

- Space for workshops is limited!
- Please submit your Registration form before November 10th 2011.

The Conference highlights include the newest and hottest Profile features:

- eFax and SMS Patient Notification
- iPad functionality with Profile
- Accession Patient

Presentations are open to all participants.

Workshops Description

Financials: How Profile Can Help You Manage Your Money

Level: Intermediate

Find answers to the most commonly raised 'how to' questions about financials within Profile such as processing WCB eForms and private billing. Learn how to customize the Reconciliation screen to manage remittances and rejections. Enhance your understanding of financial reporting.

Configuration: Tips and Tricks for Advanced Users

Level: Advanced

Configure Profile to meet your needs and learn a wide range of system configuration tools. Tailor Profile's appearance and behaviour by changing defaults, filters and preferences.

Encounters: Getting the Most out of Your Clinical Data Entry

Level: Intermediate

Entering encounter notes can be faster and easier if you know how to adjust Profile to match your specific workflow. Learn how to:

- Set clinical preferences to meet your workflow requirements,
- Filter Review Encounters and set up Unresolved Contacts,
- Customize typing templates for automatic data entry and automatic disease coding,
- Create and use embedded observations for common measures,
- Use Problems for faster contact coding & dynamic encounter review.

Lab Results: Tools to Help You Review and Analyze Results

Level: Intermediate

Configure options and appearance for ideal lab workflow. Learn how to review the cumulative view, map results with drugs and cross-reference labs. Enhance your efficiency by customizing abnormal results display and configuring task templates for unsigned transactions.

Care Plans: Improving Patient Care through EMR

Level: Intermediate to Advanced

Learn multiple ways to improve tracking and recording of ongoing patient care. Understand how to use Care Plans, Interventions, Immunisations and Recalls to their full potential.

Find Object Queries: Creating Custom Reports with the FOQ Tool

Level: Advanced

Find Objects is a powerful built-in tool that is often underutilized by users. Find out how to use Find Objects to create custom reports for your clinic. Understand how to navigate the Find Objects interface. Learn how to create, edit and run custom queries. A few tips and tricks will make this job easy.

Check the Agenda to choose any three workshops and register today!
